

## **Resolution for Medical Freedom and Individual Liberty**

WHEREAS, in March of 2020, we the people of North Carolina were told that the COVID-19 virus presented a grave danger to all. We were then instructed, and in many cases mandated, to wear masks, accept experimental injections and socially distance.

WHEREAS, government of North Carolina then took administrative and legislative actions which further eroded individual liberty:

Governor Cooper issued Executive Orders (EO) #116 and #117 which declared a state of emergency and gave him unprecedented authority he used to prohibit public gatherings, including worship services, and to close all K-12 public schools.

The North Carolina General Assembly (NCGA) passed bill H1043 which funded testing, tracking, and tracing of citizens.

EO #147 mandated all people to wear masks in public or face civil or criminal penalties.

The NCGA repealed the anti-mask statute (GS14-12.11) to allow universal masking, and passed SB232 which also made private businesses the enforcement arm of the mask mandates. Numerous North Carolinians feel that inaction by the NCGA allowed for violations of personal liberty, privacy, and body autonomy. A version of H558 considered and subsequently rejected by the Assembly possibly would have prevented administrative mandates for invasive procedures, such as COVID injections and testing, and for proof of vaccination to move about freely and, in many cases, to maintain employment.

WHEREAS, unlike other state legislatures and the U.S. Congress, the NCGA failed to conduct hearings to investigate alternative therapeutic protocols, including those based on medications such as Ivermectin and Hydroxychloroquine, which might have reduced fear, physical suffering, and death. Rather, the state government chose a hostile stance towards alternatives to government sanctioned COVID protocols including taking such actions as sending threatening communications to medical professionals.

WHEREAS, COVID treatment protocols from the National Institutes of Health (NIH) and guidance from the Centers for Disease Control (CDC) were in many instances erroneous, ineffective and/or fraudulent. These agencies now admit that masks do not stop viral transmission, that COVID injections do not stop transmission or prevent infection, and that there was no data to support six feet distancing.

WHEREAS, Government agencies, media, pharmaceutical companies, and other corporations and influencers continue to claim COVID-19 injections are “safe and effective”, while mounting evidence demonstrates alarming rates of disabling and deadly adverse events while effectiveness is increasingly suspect.

WHEREAS, COVID genetic therapy injection contents deposit widely throughout the tissues of body, are highly variable lot to lot in concentration of mRNA and of contaminants, and theoretical mechanisms exist by which they could alter human DNA.

WHEREAS, Article 4.1 of the North Carolina Republican Party Platform states: “We believe in the sanctity of all human life. Unborn children have constitutional rights to life and liberty and, the government must respect and protect all innocent human life from conception to natural death.”

WHEREAS, Article 4.11 of the North Carolina Republican Party Platform states: “We oppose the sale, purchase, possession, or use of fetal tissue or body parts obtained from induced abortions.

WHEREAS, all C-19 vaccines in use today were developed using aborted fetal cell lines and therefore violate the Pro-Life conscience and the Party platform. Therefore, be it

RESOLVED, that Republican Party of North Carolina (NCGOP) calls upon the state legislature to prohibit the sale and administration of mRNA, or other gene altering injections which are designed as immunizing agents against infecting pathogens. Be it further

RESOLVED, that NCGOP calls for comprehensive open and unbiased biomedical research, open and uncensored discussion of preventive and therapeutic medical strategies, full disclosure of any potential conflicts of interest of researchers and authorities, and proper accountability for all entities whose fraudulent or negligent actions caused harm.

RESOLVED, that NCGOP calls for the NCGA to pass legislation ending the use of aborted children in science and banning abortion developed or derived medical products.

RESOLVED, that NCGOP rejects any attempt by state or federal government authority to violate our constitutional right to assemble, including for corporate worship.

RESOLVED, that NCGOP opposes any attempt to reinstate unconstitutional invasions of privacy and personal liberty such as the proposed rules properly rejected by the NC Commissioner of Labor. Those rules would have established a system to force masking, distancing, tracking, tracing, testing, and other invasions, including injections.

RESOLVED, that NCGOP rejects yielding any authority to unaccountable and unelected agencies, such as the World Health Organization, as a threat to state and national sovereignty, and to personal liberty.

RESOLVED, that NCGOP recognizes that all North Carolinians are endowed by our Creator with inalienable rights which are affirmed by our founding documents, and mean that no government entity, whether executive, legislative, judicial, or administrative, nor any private entity, including but not limited to businesses, schools, and places of employment, shall ever have any authority to coerce or force upon any human being,

born or unborn, any medical procedure or practice including but not limited to masking, testing, vaccination, medical experiments, pharmaceuticals, or any other medical product as a condition of citizenship, patronage, employment, education, worship, assembly, or movement.
